

# Gabriel A. Tumbaga

(925) 291-0111 | GATumbaga@yahoo.com

- Objective** To continuously grow as a Full Stack Engineer in Web Development and DevOps, and to build resilient systems to aim for safely managing and deploying to production.
- Education** **University of Phoenix - Online**  
Bachelors of Science in Information Technology, emphasizing Software Engineering  
October 2007- January 2010
- Heald College, Concord, CA**  
Associate in Applied Science in Computer Technology, January 2003
- Skills** HTML, CSS, JavaScript, JQuery, Bootstrap, PHP, Drupal, Wordpress, Template Development  
Angular, React Native, MySQL, Firebase Firestore, JSON, XML, API, Apache, GIT  
Responsive Design CSS/HTML, for Desktop, Tablet, and Mobile compatibility, Docker,  
docker-compose
- Experience** **Staged Homes – 100% Telework (September 2018 – Present)**  
**Software Engineer**
- Maintaining Vanilla PHP website, Wordpress website, and several Angular websites.
  - Maintaining Linux environment for production, and several development environments, some including of docker containers, and orchestration via docker-compose.
  - Utilizing GIT version control via github, bitbucket, and amazon codecommit.
  - Migrated Firebase Realtime Database to Firebase Firestore.
  - Utilizing Firestore and Google Cloud Functions as a back end to Angular Front End sites.
  - Utilizing MySQL and PHP for Vanilla PHP site.
  - Utilized React Native for iOS/Android App development.
  - Utilizing Trello for task management.
- Perazza Prints – 100% Telework (February 2015 – Present)**  
**Web Software Engineer**
- Building custom Wordpress web application, including custom module and theme, making use of WooCommerce functionality.
  - Implemented use of GIT to version control all software projects
  - Implemented separation of Production, Staging, and Dev environments
  - Implemented use of Docker containers
  - Implemented use of Cloudflare for all of our websites
  - Integrated Mailchimp via use of their API's
  - Built and maintained E-Commerce websites via Drupal Commerce
  - Built and utilized custom Drupal modules
  - Built and utilized custom PHP server side scripts
  - Built and utilized on the fly image generation tool via PHP
  - Built and utilized csv generation tool via PHP
  - Website design via Photoshop
  - Built HTML/CSS templates from Photoshop designs
  - Made use of “responsive” design techniques for auto resizing of website to fit any screen size
  - Implemented SSL certificates for https secure connections to ecommerce sites
  - Utilized Google Merchant Center and Google Webmaster Tools
  - Integrated Drupal and ShipStation utilizing available ShipStation API
  - Integrated Drupal and Inksoft (shirt design tool) utilizing available Inksoft API
  - Implemented the company wide use of “Mantis” bug tracking web-based software
  - Managed multiple LAMP environments

# Gabriel A. Tumbaga

(925) 291-0111 | GATumbaga@yahoo.com

**Oneva Inc** – Oakland, CA (November 2016 – December 2017)

## **Software Engineer**

- Build and maintain web platform, using Drupal as an API server in the back-end, serving JSON, and AngularJS 1.5 in the front-end
- Managed LAMP environment running on the Microsoft Azure platform
- Build and maintain PHP server side scripts
- Build and maintain custom Drupal modules
- Build HTML/CSS templates from provided designs
- Design HTML page templates via photoshop
- Utilize GIT repository for version control (via bitbucket)
- Agile Development lifecycle via JIRA

**Decision Counsel** – Berkeley, CA (March 2011 – February 2015)

## **Web Developer**

- Built and maintained customized websites and custom themes via Drupal CMS
- Built and maintained “Responsive Design” websites utilizing Bootstrap framework, both as Drupal themes, and as HTML5 templates
- Built “Responsive Design” HTML emails
- Maintained LAMP servers for development and production websites
- Built HTML/CSS templates from Photoshop designs
- Helped build and maintain custom drupal modules
- Helped build a drupal based education platform for high profile clients such as Delta Airlines, Universal Studios, Best Western Hotels and more
- Interacted directly with clients to scope projects and troubleshoot issues
